

BE-1

Coax to Twisted Pair Converter for E1

data communications
The Access Company

- Conversion between coax interface and twisted pairs for E1 applications (2.048 Mbps)
- Enables standard ISDN primary rate installation over existing coax cables
- No AC or DC power required
- Insensitive to signal direction
- Immediate installation
- Miniature, lightweight Balun

Figure 1. ISDN Primary Rate from Carrier

Figure 2. ISDN over existing Copper Cables

The BE-1 Balun (coax to twisted pair converter) enables any E1 equipment with coax interface to operate over two twisted pairs (4-wire interface), as shown in *Figure 1*.

Two BE-1 units back-to-back allow 4-wire ISDN equipment to operate over existing coax cables (see *Figure 2*).

BE-1 is insensitive to the direction of the signal, allowing transmit and receive lines to be reversed without affecting operation.

BE-1 is a miniature, lightweight Balun. It operates without AC or DC power and provides up to 1000V isolation voltage for protection against AC and DC overvoltage on the line.

Specifications

Standards

Supports ITU G.703 pulse mask on unbalanced and balanced sides

Data rate

2.048 Mbps

Unbalanced Interface

Line impedance: 75Ω, unbalanced

Connectors: 2 x BNC (female or male) (see *Ordering*)

Balanced Interface

Line impedance: 120Ω, balanced

Connector: RJ-45, 8-pin

Pinout

RJ-45	BNC-1	GND	BNC-2
1			Shield
2			Core
3,6		GND	
4	Shield		
5	Core		
7,8	(Not connected)		

Power

Operates without external power supply

Physical

Length: 50 mm/2.0 in
Width: 50 mm/2.0 in
Height: 24 mm/0.9 in
Weight: 50g/1.8 oz

Environment

Temperature: 0-50°C / 32-122°F
Humidity: up to 90%, non-condensing

Ordering

BE-1/*

Legend

- * Connectors:
 - F BNC female
 - M BNC male
